Reviewer's report

Title: Long-term symptoms in dizzy patients examined in a university clinic

Version: 1 Date: 11 February 2009

Reviewer: Mikael Karlberg

Reviewer's report:

This is a large and well performed study concerning long-time follow-up of patients with dizziness examined at a tertiary referral centre. The results are interesting and the "poor" long term results must make clinicians question their present way of work.

I have no major concerns with the manuscript.

Discretionary revision:

There are some small spelling and language errors. The authors should do a professionall manuscript check.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
