Reviewer’s report

Title: Incidence and predictors of hypoglycaemia in type 2 diabetes - an analysis of the prospective DiaRegis registry

Version: 4 Date: 26 September 2012

Reviewer: Birger Thorsteinsson

Reviewer’s report:

Only one comment: My comment 1.18 and the response 1.18 from the authors have not resulted in any changes in the paper. Impaired hypoglycaemia awareness is the most important known risk marker of severe hypoglycaemia, and data on this risk marker was gathered in the DiaRegis registry. Therefore, the authors must state somewhere in the paper that e.g. "although data of the most important known risk marker of severe hypoglycaemia, impaired hypoglycaemia awareness, was scored in the DiaRegis registry (ref. 8), the completeness of data was insufficient to include this risk marker in the analyses.”

I have no other comments against acceptance of the paper.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
