Reviewer's report

Title: Prevalence of the metabolic syndrome in a rural population in Ghana

Version: 2  Date: 3 August 2012

Reviewer: Raquel Villegas

Reviewer's report:

the manuscript is interesting and well written
my only suggestion is that the authors include some discussion of how this population may differ from the rest of Ghana, participants work in the same company
there are interesting results in tables on occupation and education that should be addressed in the discussion

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
