Reviewer's report

Title: Relationship between clinical characteristics and survival of gastroenteropancreatic neuroendocrine neoplasms: A single-institution analysis (1995 - 2012) in South China

Version: 2 Date: 22 November 2012

Reviewer: Anja Rinke

Reviewer's report:

Most concerns have been responded to, acceptable now

Positive rates of chromogranin A (CgA) and synaptophysin (Syn) immunohistochemically were 69.1% and 90.2%, respectively. 87 patients (51.5%) had G1 tumors, 31(18.3%) G2 tumors and 51 (30.2%) G3 tumors.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
