Reviewer's report

Title: Relationship between clinical characteristics and survival of gastroenteropancreatic neuroendocrine neoplasms: A single-institution analysis (1995 - 2012) in South China

Version: 2 Date: 24 November 2012

Reviewer: Frederico Costa

Reviewer's report:

I would like to congratulate the authors for the significant improvement in the manuscript. All the questions and changes were performed. There is no other major Compulsory revision necessary. The manuscript is accepted and good to go.

Minor Essential Revision

Pag 7, line: Change “The most common sites was the pancreas” by the most common sites were the pancreas.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
