The paper has improved much, however, it is better to underline the steroid deficiency might have role in development of FSGS. Additionally, it could be better to remove the paragraph which start with “Metwalley KAK et al [11] reported a case of 18 month old…”, since the phenotype and MRAP have been mentioned in previous paragraph.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
