Reviewer’s report

Title: Current Practice of Glucocorticoid Replacement Therapy and Patient-Perceived Health Outcomes in Adrenal Insufficiency A Worldwide Patient Survey

Version: 2 Date: 26 May 2012

Reviewer: Miguel Debono

Reviewer’s report:

The authors have responded to most of the important queries and in addition further interesting data have been presented. I would only suggest adding as a limiting factor that patients with secondary adrenal insufficiency may have other hormone deficiencies which could also impact on QOL.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
