Reviewer's report

Title: A case report of syndrome of inappropriate antidiuretic hormone secretion with Castleman's disease and lymphoma

Version: 1 Date: 30 October 2012

Reviewer: Tomoaki Murakami

Reviewer's report:

- Major Compulsory Revisions

1. Although the patient demonstrated severe hyponatremia, the urinary osmolality -257mOsm/kg H2O- was relatively low. Why?

2. You should write all drugs she was medicated. If she was treated with insulin only, it is better to mention the fact.

3. You might want to refer to the vasopressin V2 receptor antagonist.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
