Reviewer’s report

Title: Acute severe hypothyroidism is not associated with hyponatremia even with increased water intake: a prospective study in thyroid cancer patients

Version: 2 Date: 29 June 2013

Reviewer: Michael Croxson

Reviewer’s report:

I am happy with the submitted comments and revised paper and accept that it is suitable for publication, but would suggest the authors include in the abstract, in the Methods section, that their findings relate to serum sodium measured after two weeks of triiodothyronine (T3) withdrawal.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
