Reviewer's report

Title: Development of skin Hypopigmentation in a patient with metastatic papillary carcinoma thyroid treated with Sorafenib

Version: 1 Date: 1 July 2013

Reviewer: Alessandro Antonelli

Reviewer's report:

- Major Compulsory Revisions

The paper reports the first case of hypopigmentation related to sorafenib therapy, suggesting hypopigmentation as a potential side effect. It is interesting, it could be reduced to a Letter to the Editor.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
