Reviewer’s report

Title: Reducing resistance to treatment, through group intervention, improves clinical measurements in patients with type 2 diabetes.

Version: 3 Date: 10 November 2013

Reviewer: Dorit Nitzan Kaluski

Reviewer's report:

Discretionary Revisions

Recommendations for improvement which the author can choose to ignore. For example clarifications, data that would be useful but not essential.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests' below:

I have never received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this paper, either now or in the future.

I do not hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this paper, either now or in the future.

I have never applied or applying for any patents relating to the content of the manuscript? Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript.

I do not have any other financial competing interests.

I do not have any non-financial competing interests in relation to this paper.
