Reviewer's report

Title: Serum homocysteine levels are decreased in levothyroxine-treated women with autoimmune thyroiditis.

Version: 3 Date: 14 February 2014

Reviewer: Tríona O'Shea

Reviewer's report:

Major: the authors have adequately addressed major compulsory revisions in my opinion

Minor: Could the authors use either L-T4 or levothyroxine throughout, instead of interchangeably?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
