Reviewer’s report

Title: Testicular histological and immunohistochemical aspects in a post-pubertal patient with 5 alpha-Reductase type 2 Deficiency. Case report and review of the literature in a perspective of evaluation of potential fertility of these patients.

Version: 2 Date: 27 February 2014

Reviewer: Triona O’Shea

Reviewer’s report:

Minor Reviews:
In abstract (conclusions) consider replacing "confront" with either "compare" or "contrast"

Are differing levels of spermatogenesis in different patients with 5 alpha reductase deficiency related to position of testes or to differing levels of DHT?
Is TESE feasible in patients with cryptorchidism?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
