Reviewer’s report

Title: Emotionally induced galactorrhoea in a non-lactating female -"Pseudo-Lactation"?

Version: 2  Date: 5 November 2014

Reviewer: Dimitra Argyro Vassiliadi

Reviewer’s report:

Unfortunately, the provided data do not unequivocally support the case. The investigations are inadequate and there are many assumptions and less evidence in order to establish causal association of this patient’s galactorrhea, with the visual or auditory stimuli from the newborn.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
