Reviewer's report

Title: Assessment of the role of transcript for GATA-4 as a marker of unfavorable outcome in human adrenocortical neoplasms

Version: 7 Date: 8 June 2004

Reviewer: Alessandro Peri

Reviewer's report:

The manuscript has been modified, as requested. However, I have to raise some minor points:
- Refs 6 and 7 have been inverted in the Reference list.
- Page 9, last line. Use 4.14... instead of 4,14... Please, follow the same rule when indicating mean values and SE (i.e. page 11).
- Figs 6 and 7 still appear in the figure legend.

What next?: Accept after minor essential revisions

Level of interest: An article of limited interest
