Reviewer's report

Title: Prevalence and determinants of diabetes mellitus among Iranian patients with chronic liver disease

Version: 2 Date: 14 September 2004

Reviewer: Teh-la I Huo

Reviewer's report:

---------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

There has been substantial improvement of the revised manuscript, given some queries seem not amendable. I would recommend to accept this paper as it is. However, since there are still some typographical errors, careful English editing is needed before publishing this paper.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No
