Reviewer’s report

Title: Influence of antioxidant (L- ascorbic acid) on tolbutamide induced hypoglycaemia/antihyperglycaemia in normal and diabetic rats

Version: 2 Date: 19 October 2004

Reviewer: Venugopal Padmanabhan Menon

Reviewer’s report:

General
I have gone through the paper, but I am still confused with observation made by the authors that there is no sex difference in the occurrence of diabetes. The reason I mentioned this is because, the authors have done animal experiments, which are difficult to totally extrapolate to humans, while the reference substantiating their claim was related to human experiments. They should be asked to clarify if they have any reference with them in animals.

In case of the other revision, I am happy that the author have carried out.
