Reviewer's report

Title: A IGF-I promoter polymorphism modifies the relationship between birth weight and risk factors for cardiovascular disease and diabetes at age 36

Version: 4 Date: 19 April 2005
Reviewer: johan eriksson

Reviewer's report:

General
The authors' have responded to my queries adequately and the revised version takes into account those points raised by me.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
