Reviewer's report

Title: The role of Se, vitamin C, and zinc in benign thyroid diseases and of Se in malignant thyroid diseases: low Se levels are found in subacute and silent thyroiditis and in papillary and follicular carcinoma

Version: 1 Date: 12 September 2007

Reviewer: lutz schomburg

Reviewer's report:

General
The manuscript has been improved by the revision and merits publication.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
none

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
none

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
I declare that I have no competing interests.
