Reviewer's report

Title: Family history of diabetes and clinical characteristics in Greek subjects with type 2 diabetes

Version: 3 Date: 10 February 2009

Reviewer: Samy HADJADJ

Reviewer's report:

The authors made substantial modifications to the manuscript. It is probably acceptable for publication. The last point to address is the statistical analyses: due to the familial structure of the study, the use of "non-classical statistics" such as "GEE" should be considered. The opinion of an expert in statistics should be asked for. The manuscript is otherwise suitable for publication.
