Reviewer's report

Title: Outcome of Root Canal Therapy in a General Dental Centre

Version: 2 Date: 30 June 2012

Reviewer: Mohammad Ahmad M Al-Omari

Reviewer's report:

Although the article is well written, unfortunately the following were noticed:

1) Sample size is too small
2) Too many researchers (7) but only one surgeons did the assessment for the radiographs.
3) Kappa test should be performed to check levels of agreement "examiner reliability"
4) Taper of GP filling should have been added to the assessment criteria, as cold lateral technique is used.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
