Reviewer's report

Title: Association between gingival bleeding and gingival enlargement and Oral health-related quality of life (OHRQoL) of subjects under fixed orthodontic treatment: A cross-sectional study

Version: 2  Date: 19 November 2012

Reviewer: Kerstin Öhrn

Reviewer's report:

I am happy with the revised version with one exception. It is not appropriate to include subject's education in the analyze, because the participants were too young and information on their exact age was not available. Consequently I want you to remove education from all analyzes.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
