Reviewer's report

Title: Dental caries among children visiting a mobile dental clinic in South Central Kentucky: a pooled cross-sectional study

Version: 1 Date: 11 March 2013

Reviewer: Catherine Binkley

Reviewer's report:

Minor Essential Revisions:
1. In Results section, p. 4. Spell out numbers (for percentages) when they are placed at the beginning of a sentence.
2. Throughout Results, replace "were" with "are" when stating the results are presented in Tables or Figures.

Discretionary Revisions
1. This reader would like to know where the majority of the non-white children resided - urban or rural?
2. Dentist participation in Kentucky is generally low. This reader would like to know if there are fewer dentists participating in Medicaid in the rural areas of the study than in the Bowling Green area because this could impact access to care for the children enrolled in Medicaid.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
