Reviewer's report

Title: Periodontal conditions in patients with Marfan syndrome - a multicenter case control study

Version: 1 Date: 9 September 2013

Reviewer: Carla Evans

Reviewer's report:

The authors address an issue that has long been overlooked, namely the periodontal status of Marfan syndrome patients. The sample is large and the methods are suitable. The write up includes the important features of the syndrome and the findings are discussed clearly.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
