Reviewer's report

Title: Soluble toll like receptor 2 (TLR-2) is increased in saliva of children with dental caries.

Version: 1 Date: 8 May 2014

Reviewer: Fernando Neves Nogueira

Reviewer's report:

The paper presents the possibility of using a new salivary marker for dental caries. The paper is relevant and this article is well written and grounded.

Minor Essential Revisions:

The authors could discuss a possible correlation between number of caries lesions and the amount of the salivary marker. If this salivary marker could also predict the severity of the disease.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
