Reviewer’s report

Title: Correction of malocclusion and oral rehabilitation in a case of amelogenesis imperfecta by insertion of dental implants followed by Le Fort I distraction osteogenesis of the edentulous atrophic maxilla

Version: 3 Date: 18 April 2014

Reviewer: Mousumi Goswami

Reviewer’s report:

Major Compulsory Revisions

1. There is no post operative radiograph to substantiate the work
2. The pre operative treatment plan is well discussed but the interoperative photographs or radiographs to demonstrate placement of distractors and implants not there.
3. It is difficult to appreciate if this is a denture prosthesis or implant supported prosthesis (kindly support with intraoral / occlusal X Rays)

Minor Essential Revisions

4. Spelling mistakes to be corrected. Kindly use spellcheck.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
