Reviewer's report

Title: A comparative study of the debridement efficacy and apical extrusion of dynamic and passive root canal irrigation systems

Version: 1 Date: 24 December 2013

Reviewer: Mario Tanomaru-Filho

Reviewer's report:

Major compulsory revisions:
- authors should explain the use of no irrigation as control group.
- it necessary details about the teeth selection considering the initial diametre of apical root canal and how this parameter was standardized.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
