Reviewer's report

Title: The effect of mouthwashes containing biguanides on the progression of erosion in dentin

Version: 2 Date: 12 May 2014

Reviewer: Florian J. Wegehaupt

Reviewer's report:

Major Compulsory Revisions:
Concerning the statistical analysis, please explain if you checked the data for normal distribution. I see a problem as the SD (for example at day 6) is in some groups only about 4% of the mean value and in another group about 31%.
Furthermore, in the destilles water group, the SD was 35% at day 5 and than at day 6 its now about 4%.

Minor Essential Revisions:
In the M&M section under Sample preparation, please do not use the word diameter for explaining how thick your spacer was. Instead rewrite the sentence by using the word thickness. E.g. ... were separated by a spacer of 4 mm thickness.

Please use l instead of L when referring to a volume.

Please check the journal style for the reference list.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
