Reviewer's report

Title: A Pilot Study to assess Oral Health Literacy by comparing a Word Recognition and Comprehension Tool

Version: 2 Date: 30 June 2014

Reviewer: Argy Polychronopoulou

Reviewer's report:

The present paper explores oral health literacy by using the REALD-30 tool in older adults.

The topic is of interest.
The authors address adequately the research hypotheses under investigation.

Rating

The following points could be added/improved:
The methods section could be decreased in length.
Appropriate statistical methods were used; however, predictors included in multivariate regression models should be provided.
Tables and figures are not of adequate quality and must be modified for better understanding.

Rating

Accept after discretionary revisions.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
