Reviewer's report

Title: Screening for oral potentially malignant disorders among areca (betel) nut chewers in Guam and Saipan

Version: 5 Date: 3 November 2014

Reviewer: Zohaib Khan

Reviewer's report:

Minor Essential Revision: Page 15 Line 8 -10, "The higher prevalence of OPMD in Micronesia is due to oral sub-mucous fibrosis commonly found in this population and contrasting life-style habits in Micronesia compared with the US population", from this sentence It may appear as if OSMF is a "cause" of OPMD, while in reality it is a type of OPMD, so perhaps the sentence can be rephrased to make this clear.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
