Reviewer's report

**Title:** Care coordination among pediatricians and dentists: A cross-sectional study of opinions of North Carolina dentists

**Version:** 2  **Date:** 24 March 2014

**Reviewer:** William Murray Thomson

**Reviewer's report:**

Minor essential revisions

There are just a couple of very minor editorial corrections required:

Discussion, lines 2-3 – change ‘an 18 month old low caries risk child’ to ‘an 18-month-old low-caries-risk child’ – if you are going to use such large compound words, you have to hyphenate them.

Page 13, line 1 – remove the comma after ‘et al’ – it should not be there, because the year is in brackets anyway.

Table 3 - if you are going to have some of your data to 2 decimal places, then all of the data in that Table should be to 2 dp, for the sake of consistency.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
