Reviewer’s report

Title: Effectiveness of a quality management program in dental care practices

Version: 2 Date: 3 March 2014

Reviewer: Jan Clarkson

Reviewer’s report:

I have reviewed the changes and content that the authors have addressed the referees comments. If the decision is to publish there needs to be some grammatical corrections and I suggest they check for consistency eg when referring to general medical practice that the authors use the word medical. I suggest also that the abstract is amended to include the exploratory nature of the work and more clearly describe the two groups.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
