Reviewer’s report

Title: Reliability and validity of a questionnaire for self-assessment of complete dentures

Version: 4 Date: 3 April 2014

Reviewer: Peter Robinson

Reviewer’s report:

I have read the latest version of the manuscript. The authors still do not define the PDA or the construct and have not looked at the critique of the positive concept of health that they advocate. It is unusual to encounter authors so unresponsive to a reviewer’s commentary.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.'
