Title: Referral and provision of specific dental procedures by general dentists in the National Dental Practice-Based Research Network: questionnaire findings

Version: 2 Date: 30 September 2014

Reviewer: Irene Aartman

Reviewer's report:

Discretionary Revisions
1. In the abstract, the results are very general. I advise to report at least which procedures were classified as “uncommon”, “common” and “very uncommon”.
2. In Table 3, the results are given in a descriptive way. As long as the numbers will be available to the readers by the given link, that is fine. But the numbers should be available.
