Reviewer’s report

Title: Dental General Anaesthetic Trends Among Australian Children

Version: 2 Date: 28 November 2006

Reviewer: Keith Milsom

Reviewer’s report:

General
The authors suggest that annual male dga is higher than female dga except in 95/96. The data does not show this. In 95/96 the male dga was 266.3 female dga was 248.0.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
