Reviewer’s report

Title: Oral maxillofacial neoplasms in an East African population a 10 year retrospective study of 1863 cases using histopathological reports.

Version: 2 Date: 20 April 2008

Reviewer: Taiseer Al-Khateeb

Reviewer’s report:

The authors failed to deal with most of essential points that can render their manuscripts worthy of publication

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
