Reviewer's report

Title: Oral maxillofacial neoplasms in an East African population a 10 year retrospective study of 1863 cases using histopathological reports.

Version: 2 Date: 20 April 2008

Reviewer: oladapo O olasoji

Reviewer's report:

Major Compulsory Revisions.

Based on my comments/suggestions, the following corrections/modifications have been carried out in the Revised version of the manuscript;

1. The title of the manuscript had been modified to reflect that the authors made use of histopathology reports only for the study.

2. This had also been acknowledged in the interpretation of the Results and also acknowledged in the Discussion of the Results.

3. This in my opinion improves the standard of the manuscript by giving a clear guide in the interpretation of the Data by would be readers of the manuscript.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
