Reviewer's report

Title: Periodontal conditions, oral Candida albicans and salivary proteins in type 2 diabetic subjects.

Version: 1 Date: 5 February 2009

Reviewer: Khalid Almas

Reviewer's report:

Discretionary Revisions:
The sampling technique; The sample may be considered as convenient sample. It is not a representative sample. The sample size for future study should be based on power analysis.

The Conclusion at the end: Rephrase it as increasing number of teeth in female population does not reflect the finding of the paper. The conclusion in abstract is OK.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
