Reviewer's report

Title: A cluster randomised control trial investigating the effectiveness of personalised letters sent subsequent to school dental screening in increasing dental registration rates in unregistered 12-13 year old children in South-East Scotland

Version: 2 Date: 3 February 2009

Reviewer: Peter Robinson

Reviewer's report:

The authors have now made the revisions I suggested after the first submission of this paper. The results and discussion are much more focussed on the aim of the project and the report is much more cohesive as a result.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
