Title: Recommendations to improve the end-of-life care system for homeless populations: A qualitative study of the views of Canadian health and social care professionals

Version: 2 Date: 4 August 2012

Reviewer: Edward Ratner

Reviewer's report:

The authors have accepted all recommendations made and have clarified a variety of issues. The underlying work was well done and the current manuscript explains it clearly.

I appreciate, but do not expect acknowledgement by authors for recommendations made during formal peer review.

Level of interest: An article of importance in its field
