Title: Towards a standardised approach for evaluating guidelines on Palliative Sedation: Study Protocol

Version: 4 Date: 27 April 2014

Reviewer: Myriam Deveugele

Reviewer's report:

As mentioned in the first review, this is an important article. I would have loved a letter from the authors explaining why they reviewed the article as they did, because I do not think they responded to all my questions raised in my previous report.

Some of the comments are taken into account and this is done good.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
