Reviewer's report

Title: Assessment of knowledge, attitude and practice and associated factors towards palliative care among nurses working in selected hospitals, Addis Ababa, Ethiopia

Version: 3 Date: 22 October 2013

Reviewer: Martin Weber

Reviewer's report:

Major compulsory revisions

As far as I can see, the answers 3, 4 and 5 of the cover letter concerning my review do not have a correlate in the revised manuscript.

There are still many typographic errors, grammar errors, formatting issues, punctuation errors.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
