Title: Sedation in palliative care - a critical analysis of 7 years experience

Authors:

Prof H.Christof Muller-Busch (muebu@t-online.de)
Inge Andres (andresi@t-online.de)
Thomas Jehser (tjehser@havelhoehe.de)

Version: 4 Date: 7 May 2003

Reviewer: Lukas Radbruch

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Other (see below)

I think that the revision has improved the manuscript considerably. It still suffers from the drawbacks of a retrospective evaluation, but the information in the manuscript is very important, considering the extensive discussion on the issue of terminal sedation. I would recommend to accept the revised paper without any additional changes.
