Reviewer’s report

Title: Factors associated with multiple transitions in care during the end of life following enrollment in a comprehensive palliative care program

Version: 1 Date: 30 January 2006

Reviewer: Linda J Kristjanson

Reviewer’s report:

General

This is an excellent paper that addresses an important topic. The methods are well described and carefully reported. Analysis methods are sound and findings are not overstated. Discussion is reasonable and limits are acknowledged.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

none

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

none

Discretionary Revisions (which the author can choose to ignore)

none

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
