Reviewer's report

Title: Compliance and treatment satisfaction of post menopausal women treated for osteoporosis

Version: 2 Date: 12 March 2010

Reviewer: Marco Gambacciani

Reviewer's report:

MAJOR REVISION
1. Present paper describes the information given by MDs and Patients.

2. The AA should quote and discuss different papers reporting the pharmacy data providing a real use and thus the real adherence to medication, that are quite different from those reported.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
