Reviewer's report:

The authors have addressed all my concerns. I have no additional comments on revisions. The manuscript is greatly strengthened through improvements in clarity, elimination of redundancy, and reorganization of the results. The authors present important data for understanding the role and significance of food and food preparation on low income women of Mexican origin. This information provides valuable contextual factors that should be incorporated into culturally competent to health promotion programs.

Level of interest: An article of importance in its field
