Reviewer’s report

Title: Prevalence and Factors Associated with Urinary Incontinence in Community Dwelling Adult Women: Implications for Health Promotion

Version: 2 Date: 18 January 2013

Reviewer: ROSLIN BOTLERO

Reviewer’s report:

Major compulsory revisions:

1. Referencing style should be uniform and consistent throughout the manuscript.

2. Please mention in the Method section whether a validated instrument was used to measure the severity of UI symptoms. Also, in the Study Instrument section consider revising 2nd line of 1st paragraph, 5th sentence of 2nd paragraph.

3. Data analysis section of Method needs to be elaborated and clearly described. For example, in multiple regression analysis which variables were considered in the model.

4. Results section: findings from the multiple regression need more interpretation.

5. Discussion and conclusions: a bit more description is needed on implications for clinicians and for policy makers in terms of health promotion

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
