Reviewer's report

Title: Quality of life, coping strategies and support needs of women seeking Traditional Chinese Medicine for infertility in Australia: a mixed methods approach

Version: 2 Date: 17 January 2013

Reviewer: Petra Thorn

Reviewer's report:

The authors have incorporated changes that improve the quality of the article.

However, I find that my comment of the role of ACCESS and ANZICA regarding the provision of support for individuals and couples experiencing infertility has not been addressed. The sweeping statement describing a lack of support has remained in this version of the paper!

Otherwise, the article has improved.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
