Reviewer's report

Title: Contraceptive use and Unmet need for Family Planning among HIV Positive Women on Antiretroviral Therapy in Kumasi, Ghana

Version: 2 Date: 16 July 2014

Reviewer: Fredrick Makumbi

Reviewer's report:

Reviewer's report: Major and compulsory

Many of the previous issues are still scanty, and received minimal of no good attention, especially the statistical analysis plan section

1: The statistical analysis methods are very scanty, yet these clearly inform the results
2: The data presentation is very weak and need significant improvement
3: Many of the responses seem not to have had clear attention.
4: The authors need an English and scientific writing editor if you are to have this as an acceptable quality manuscript for the readers

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.
