Reviewer's report

Title: Women's experiences and health care-seeking practices in relation to uterine prolapse in a hill district of Nepal

Version: 2 Date: 30 December 2013

Reviewer: Pinar Ay

Reviewer's report:

The manuscript had improved and is now acceptable. The authors just need to correct the percentages on Tables 1 and 2. Some percentages are expressed with none while others with one or two decimal places.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
